

PAST PERFORMANCE

Mission work, delivered by the engineers who lead RegainFlow.

RegainFlow's contracts, and the programs its founders delivered before it. Each entry names who did the work.

MSTS

Mission Support and Test Services

DELIVERED BY	ROLE	PERIOD
RegainFlow	Subcontractor to Link Technologies	Apr 2026 – Present
NAICS		
541511 Custom Computer Programming Services		
541512 Computer Systems Design Services		
541690 Other Scientific and Technical Consulting		

Secure, on-premises AI knowledge platform

RegainFlow leads solution architecture and technical delivery for a secure, on-premises AI knowledge platform supporting MSTS. The work spans the full retrieval-augmented generation lifecycle, from document ingestion and retrieval through self-hosted LLM inference, application integration, and production deployment.

WORK PERFORMED

- Architected the document ingestion pipeline, retrieval layer, and self-hosted LLM inference on on-premises servers.
- Integrated the platform with the customer's .NET applications and hardened it to their cybersecurity requirements.
- Built the measurement layer: response time, question classification, user feedback loops, and automated evaluation against a baseline question-and-answer set using an LLM as judge.
- Lead Agile delivery, including PI planning and customer demonstrations.
- Validate business value with customer stakeholders and business process analysts, translating operational needs into production capability.

Mustang LM 400 bus: diagnostics and load shed

Diagnostics and load-shed system for the Mustang LM 400 bus, detecting power discrepancies in any component or switch.

WORK PERFORMED

- Built the diagnostics and load-shed logic for power discrepancies across components and switches.
- Stringent unit testing with GMock across object-oriented Python and C++.
- Modeled and designed the system in Cameo for the critical design review (CDR).

Enterprise AI and retrieval-augmented generation

Enterprise AI and retrieval-augmented generation delivery supporting an aerospace manufacturing environment.

04

U.S. Army

DELIVERED BY	ROLE
Leonardo J. Ramirez, CEO	Captain

Engineer, Signal, and Cyber Warfare officer

Served to Captain across three specialties, ending in Cyber Warfare running defensive operations at the national level.

WORK PERFORMED

- Engineer officer.
- Signal officer supporting Space and Missile Defense.
- Cyber Warfare officer running defensive cyber operations at the national level.
